PGY1 PHARMACY RESIDENCY

DEPARTMENT OF VETERANS AFFAIRS GREATER LOS ANGELES HEALTHCARE SYSTEM

Introduction

The VA Greater Los Angeles Healthcare System (VAGLAHS) is one of the largest health care facilities within the Department of Veterans Affairs. It is one component of the VA Desert Pacific Healthcare Network (VISN22) offering services to Veterans residing in Southern California and Southern Nevada. VAGLAHS consists of two ambulatory care centers, a tertiary care facility and 8 community based outpatient clinics. VAGLAHS serves Veterans residing throughout five counties: Los Angeles, Ventura, Kern, Santa Barbara, and San Luis Obispo. There are 1.4 million Veterans in the VAGLAHS service area. VAGLAHS is affiliated with both UCLA School of Medicine and USC School of Medicine, as well as more than 45 colleges, universities and vocational schools in 17 different medical, nursing, paramedical and administrative programs.

The West Los Angeles Healthcare Center (WLA) is a tertiary care teaching facility dedicated to providing a wide array of acute and ambulatory patient care services to our nation's veterans. The comprehensive diagnostic and treatment services provided include a broad range of medical, surgical, and psychiatric care. Internal medicine subspecialties include cardiology, infectious diseases, gastroenterology, allergy, pulmonology, nephrology,

endocrinology, rheumatology, and hematology/oncology. Major surgical subspecialties include orthopedics, urology, neurosurgery, ophthalmology, plastics, ENT, podiatry, and cardiothoracic surgery. In addition to the main acute care hospital, there is a 180-bed nursing home, a hospice unit, and Home-Based Primary Care.

The *Sepulveda Ambulatory Care Center (SACC)* offers a state-of-the-art ambulatory care facility. The center has specialty outpatient programs in spinal cord injury, stroke rehabilitation, women's health, preventative medicine, dentistry, and mental health, and chemical dependency. Extended care activities include a 120-bed Academic Nursing Home and a Home-Based Primary Care Program. The facility hosts extensive clinical and basic science research, including Geriatric Research Education and Clinical Center (GRECC) and Field Program for Health Science Research and Development (HSR&D). The HSR&D program evaluates provider practice and patient outcome studies in the delivery of ambulatory health care.

The *Los Angeles Ambulatory Care Center (LAACC)* is located in the heart of Downtown Los Angeles. It serves as a centrally located facility for the diverse veteran population of the city of Los Angeles, focusing on primary care and mental health services. The clinic provides special services in post-traumatic stress disorder, day treatment, medical service, and mental health services.

General Information

The PGY1 Residency in Pharmacy at VAGLAHS was first established in 1952 and is considered one of the first postgraduate pharmacy programs in the nation. In 1963, it was one of the first pharmacy residency programs accredited by ASHP. It is a twelve-month long program that offers a diverse hospital-based residency experience with emphasis on clinical pharmacy activities. This residency is structured to offer the resident a well-rounded clinical experience in acute care, ambulatory care, and pharmacy administration.

The VAGLAHS also offers PGY2 specialty residency programs in the area of Ambulatory Care and Neurology, as well as a 2-year fellowship in Cardiology. The PGY2 programs allow for Early Commitment. Please refer to the PGY2 Program Booklet for more information.

Pharmacists completing this residency will be competent and confident practitioners in multiple patient-care environments. They will demonstrate competence by appropriately utilizing their clinical knowledge and skills, with the ultimate goal of possessing the ability to apply these skills to a variety of situations. They will develop confidence through the feedback and independence offered to them through each of their experiences. These pharmacists will be accountable for achieving optimal drug

therapy outcomes as members of the healthcare team. They will also refine their skills in educating other healthcare professionals and patients on drug-related topics.

Rotations offered through the residency provide experiences in acute care medicine, cardiology, GI/hepatology, geriatrics, infectious diseases, long term care, critical care, neurology, oncology, pharmacy benefits management, drug information, ambulatory care, psychiatry, surgery/TPN as well as opportunities in pharmacy research, quality assurance, and departmental administration. Experiences for select elective rotations are offered at other divisions within VAGLAHS, including SACC and LAACC. Focused areas of study are available in Acute Care, Ambulatory Care, and Neurology.

VAGLAHS has established academic affiliations with local schools of pharmacy including USC, UCSF, UOP, Western University, and Loma Linda University. Residents have ongoing teaching responsibilities to pharmacy students and other trainees, as well as hospital staff. VAGLAHS is affiliated with the USC School of Pharmacy and offers residents the option of a teaching certificate and appointment as Adjunct Assistant Professor at the USC School of Pharmacy.

PGY1 PHARMACY RESIDENCY

DEPARTMENT OF VETERANS AFFAIRS GREATER LOS ANGELES HEALTHCARE SYSTEM

Program Description

VAGLAHS PGY1 Pharmacy Residents must successfully complete 8 six-week rotations.

Program Components	Description
Rotations	<div> <div> REQUIRED (4 rotations) <ol style="list-style-type: none"> 1. Acute Care Medicine 2. Pharmacy Benefits Management (PBM) + Management 3. Ambulatory Care (Primary Care) <p>at one of the following sites:</p> <ul style="list-style-type: none"> • West Los Angeles Campus • Sepulveda Campus • Los Angeles Campus 4. Critical Care <p>in one of the following areas:</p> <ul style="list-style-type: none"> • Cardiac Care Unit (CCU) • Medical ICU (MICU) • Surgical ICU (SICU)/TPN </div> <div> ELECTIVES (choice of 4) <ul style="list-style-type: none"> Cardiac Care Unit (CCU) Emergency Department* Gastroenterology/Hepatology Geriatrics Hematology/Oncology Infectious Diseases/Antimicrobial Stewardship Informatics* Medical ICU (MICU) Mental Health Neurology Inpatient Neurology Ambulatory Care Pain* Primary Care – West Los Angeles Campus Primary Care – Sepulveda Campus Primary Care – Los Angeles Campus Surgical ICU (SICU)/TPN Transitions of Care* </div> </div> <p>(*new rotations proposed to start during AY 2021-2022)</p>
Area of Focus (Optional; Accomplished by 2 elective rotations)	Acute Care Ambulatory Care Neurology
Staffing Requirements	Residents are required to function as a pharmacist in the inpatient setting for average 1 day every weekend for 3 rotations of the year, as well as at least 1 day in the outpatient setting (total 18 weekend days). Inpatient staffing covers ICU, ward, and ED patients, in addition to patients on PK and heparin per pharmacy medications. Additional outpatient staffing experience is integrated into ambulatory care rotation(s), where the residents will assist in reviewing and finishing computerized prescriptions.
Residency Research Project	Residents are required to complete a research project to be presented at a regional conference. Residents are also required to complete a manuscript suitable to submit for publication, a poster presenting the research project, and a completed research folder.
Teaching Responsibilities	<p>Residents will have the opportunity to precept APPE pharmacy students (Level IV), IPPE pharmacy students (Level I/II/III), and pre-pharmacy students.</p> <p>Residents also have the option of a joint academic appointment with the USC School of Pharmacy which offers opportunities to teach and lecture to Level I, II and III Pharm.D. students, and to undergraduate pre-pharmacy students. Residents are provided the opportunity to participate in various scheduled coursework and seminars developed to enhance the residency experience. Those residents participating in this affiliation will receive faculty appointment and earn a teaching certificate from the university. A separate interview with USC may be required for this affiliation. Residents interested in the affiliation are also required to have an active California Pharmacist License.</p>

PGY1 PHARMACY RESIDENCY

DEPARTMENT OF VETERANS AFFAIRS GREATER LOS ANGELES HEALTHCARE SYSTEM

Area of Focus: Acute Care

General Information

The VA Greater Los Angeles Healthcare System (VAGLAHS) offers a distinctive experience in the area of acute care. All acute care rotations take place at the West Los Angeles (WLA) campus. Acute care rotations offered include general medicine (GMED), medical intensive care unit (MICU), cardiac care unit (CCU), and surgical intensive care unit (SICU)/total parenteral nutrition (TPN).

Preceptors involved with each rotation are specially trained, many having completed post-doctorate residencies and obtained board certification in pharmacotherapy.

In these rotations, residents will work closely with clinical pharmacists. Residents will also round with providers and ancillary services as an active member of the healthcare team. Residents will regularly review medication profiles for appropriateness of therapy, evaluate laboratory tests as they relate to drug therapy, obtain complete medication histories to detect adverse drug events, drug interactions, allergies, and

other untoward drug related effects, recommend alternatives to prescribed drug regimens when appropriate with an expected endpoint of achieving optimal pharmacotherapy, and provide drug information services and patient education.

As pertinent to each rotation, residents will have opportunities to perform pharmacokinetic dosing and heparin monitoring, BLS/ACLS, review ICU sedation and paralytic protocols, monitor pressors, initiate/adjust TPN, perform medication reconciliation on admission and discharge, and provide patient counseling.

A focused area of study in acute care is available for residents interested in receiving additional training in this specialty. This can be achieved by completing the core acute care requirements and two additional ICU rotations. Core acute care requirements are accomplished by completing GMED and one ICU rotation in MICU, CCU, or SICU.

Practice Experience

General Medicine (GMED):

*Primary Preceptors: Annie Shen, Pharm.D., BCPS;
Grace Jang, Pharm.D., BCPS*

Commonly encountered and monitored disease states:

- Respiratory Disorders: COPD/asthma, PE
- Infectious Diseases: pneumonia, sepsis, UTI, OM, endocarditis, septic arthritis, meningitis
- Cardiovascular Disorders: HTN, CHF, AFib, dyslipidemia
- Neurological Disorders: pain, dementia, stroke, psychiatric disorders
- Endocrine Disorders: DM
- Gastrointestinal Disorders: GERD, PUD, pancreatitis
- Genitourinary Disorders: acute/chronic renal failure, ESRD, electrolyte abnormalities, BPH

Medical Intensive Care Unit (MICU):

Primary Preceptor: Catherine Paiste, Pharm.D.

Commonly encountered and monitored disease states:

- Respiratory Disorders: COPD/asthma, ARDS, PE
- Infectious Diseases: pneumonia, sepsis
- Cardiovascular Disorders: pressor support, cardiogenic shock
- Neurological Disorders: ICU sedation, paralytics, seizures
- Endocrine Disorders: DKA, thyroid crisis
- Gastrointestinal Disorders: UGIB, hepatitis
- Renal Disorders: ESRD on HD/CRRT

Cardiac Care Unit (CCU):

*Primary Preceptors: Jennifer Chang, Pharm.D., BCPS;
Kevin Yamashiro, Pharm.D.*

Commonly encountered and monitored disease states:

- Infectious Diseases: endocarditis, sepsis
- Cardiovascular Disorders: ACS (unstable angina, NSTEMI/STEMI, PCI), CAD, CHF/cardiomyopathy, AFib/RVR, AVR/MVR, arrhythmias, pulmonary hypertension, pressor support, dyslipidemia, hypertensive urgency/emergency
- Genitourinary Disorders: electrolyte abnormalities, acute/chronic renal failure, ESRD on HD/CRRT, BPH
- Endocrine Disorders: hyper/hypothyroidism, DM

Surgical Intensive Care Unit/Total Parenteral Nutrition (SICU/TPN):

Primary Preceptor: Claire Hwang, Pharm.D.

Commonly encountered and monitored disease states:

- Respiratory Disorders: ARDS
- Infectious Diseases: pneumonia, sepsis, UTI, bacteremia
- Cardiovascular Disorders: Post-CABG/AVR/MVR care, cardiogenic shock, pressor support
- Neurological Disorders: ICU sedation, paralytics, seizures, post-craniotomy/laminectomy
- Gastrointestinal Disorders: SBO/ileus
- Endocrine Disorders: parathyroidectomy, DM
- Renal Disorders: ESRD on HD/CRRT, electrolyte abnormalities
- Genitourinary Disorders: radical prostatectomy
- Musculoskeletal Disorders: THA, TKA, ORIF
- Nutrition: Parenteral nutrition, re-feeding syndrome, TF

PGY1 PHARMACY RESIDENCY

DEPARTMENT OF VETERANS AFFAIRS GREATER LOS ANGELES HEALTHCARE SYSTEM

Area of Focus: Ambulatory Care

General Information

The VA Greater Los Angeles Healthcare System (VAGLAHS) offers a distinctive experience in the area of ambulatory care. The three campuses, located in West Los Angeles, Downtown Los Angeles, and North Hills, provide a wide variety of exposure to the different clinics and training environments unique to each of the sites.

Preceptors involved at each site are specially trained, many having completed post-doctorate residencies and obtained advanced certifications.

In these rotations, residents will work with clinical pharmacists in our primary care and sub-specialty clinics, participating as integral members of an interdisciplinary team. Residents will regularly review medication profiles for appropriateness of therapy, evaluate laboratory tests as they relate to drug therapy, obtain complete medication histories to detect adverse drug events, drug interactions, allergies, and other untoward drug related effects, recommend alternatives to prescribed drug regimens when appropriate with an expected

endpoint of achieving optimal therapy, provide drug information services, and provide patient education.

Residents will provide care in our Patient Aligned Care Teams (PACT) clinics, the VA-coined patient centered medical home model of care, as well as in other sub-specialty clinics providing comprehensive medication management services. Residents will also be involved in the pharmacist-run anticoagulation clinics. Opportunities to provide care through innovative modalities, such as Clinical Video Telehealth (CVT), Shared Medical Appointment (SMAs), and VA Video Connect (VVC). Various opportunities to provide patient and staff education exists at all practice sites.

A focused area of study in ambulatory care is available for residents interested in receiving additional training in this specialty. This can be achieved by selecting the primary care rotation offered at each of the three campuses. This unique opportunity provides the resident an array of practice settings and experiences specific to each of the three sites.

Practice Experience

West Los Angeles Healthcare Center (WLA):

Primary Preceptor: Evonne Liu, Pharm.D., BCPS, BCACP

WLA provides comprehensive ambulatory care services to veterans. The center offers numerous subspecialty clinics in addition to primary care services.

Residents may participate in the following clinics/activities:

- Anticoagulation Clinic
- PACT (MTM) Clinic
- Infectious Disease Clinic
- GI/Hepatitis C Clinic
- Cardiology Clinic
- DM/Endocrinology Clinic
- Pulmonary Clinic
- Renal/Hypertension Clinic
- Neurology Clinic
- Pain Clinic
- Home Based Primary Care
- Diabetes Medication Class
- Women's Health
- Transgender Health
- Shared Medical Appt

Los Angeles Ambulatory Care Center (LAACC):

Primary Preceptor: Thien-thanh Nguyen, Pharm.D.

LAACC located in the downtown Los Angeles area has served as a model for ambulatory care service in the VA system.

Residents may participate in the following clinics/activities:

- Anticoagulation Clinic
- PACT Clinic
- Endocrinology (CVT)
- ID/HIV Clinic
- Smoking Cessation Clinic
- Lithium/Clozapine Clinic
- Parkinson's Support Group
- Diabetes Meter Training
- Brown Bag Day
- Clinical Staff Education

Sepulveda Ambulatory Care Center (SACC):

Primary Preceptor: Kristie Tu, Pharm.D., BCPS, BCGP

SACC is an interdisciplinary teaching facility in cooperation with the UCLA School of Medicine and Olive View Hospital. The clinic is located in the San Fernando Valley, 25 miles from downtown Los Angeles.

Residents may participate in the following clinics/activities:

- Anticoagulation Clinic
- PACT (MTM) Clinic
- Home Based Primary Care
- Diabetes Group Classes
- Women's Clinic
- Shared Medical Appt
- Hypertension Class
- Smoking Cessation Clinic
- Geriatrics

PGY1 PHARMACY RESIDENCY

DEPARTMENT OF VETERANS AFFAIRS GREATER LOS ANGELES HEALTHCARE SYSTEM

Area of Focus: Neurology

General Information

The VAGLAHS offers a distinctive experience in the area of neurology that is unique to this program. The facility was one of five VAs granted designation as an Epilepsy Center of Excellence and the only VA identifying a clinical pharmacist in the model of care. The facility is involved in cutting edge research, education, and clinical care, and features state of the art equipment.

West Los Angeles Healthcare Center provides a balanced experience of acute care and ambulatory care in neurology. The resident will gain clinical insights and practical

experiences in an interdisciplinary team approach to inpatient neurology care. Residents will also participate in neurology pharmacist-run clinics, where the pharmacist plays an integral role in implementing, adjusting, and monitoring drug therapy. Preceptors involved in this specialty are skilled practitioners with extensive experience in research and academia.

A focused area of study in neurology is available for residents interested in receiving additional training in this specialty. This unique opportunity provides a comprehensive experience in both inpatient and ambulatory care neurology settings.

Practice Experience

West Los Angeles Healthcare Center (WLA):

*Primary Preceptors: Sunita Dergalust, Pharm.D., BCPS,
Jin Suh, Pharm.D., BCPS*

Inpatient Experiences

- **Acute Care Neurology:** The resident will be responsible for reviewing and monitoring drug therapy and antimicrobial and anti-epileptic drug pharmacokinetic dosing consults to physicians and allied healthcare professionals. Residents will serve as the drug therapy specialist, as well as a pharmacy educator on the team. They will actively participate in interdisciplinary team meetings and medical rounds. The medical team consists of Board Certified Neurologist attendings, UCLA Neurology fellows, UCLA Neurology residents, UCLA Psychiatry interns, a clinical pharmacist, and PGY2 Neurology Pharmacy Resident.
- **Epilepsy Monitoring Unit:** This is a specialized unit that was developed as part of the Epilepsy Center of Excellence, used to properly identify seizure localization and subsequent surgical candidates. The resident will work closely with the Neurology fellow and will be responsible for obtaining a detailed admission history and medication history for long term video EEG monitoring. Residents will actively participate in assessing/planning safe drug titration on and off AEDs.
- **Acute Care Neurosurgery:** The resident will be responsible for reviewing and monitoring drug therapy and antimicrobial and anti-epileptic drug pharmacokinetic dosing consults to physicians and allied healthcare professionals. Residents will serve as the drug therapy specialist, as well as a pharmacy educator on the team. Resident will actively participate in interdisciplinary team meetings and neurosurgical rounds. The medical team consists of UCLA Neurosurgery attendings, UCLA Neurosurgery residents and Surgery interns, a clinical pharmacist, and PGY2 Neurology Pharmacy Resident.

Ambulatory Care Experiences

- **Stroke Clinic:** Resident will have the opportunity to assess/initiate/adjust medication regimens under the supervision of clinical pharmacists and attending physician. Resident responsibilities also include: interviewing patients prior to seeing their provider, reviewing medication profiles for drug interactions, appropriate dosing, therapy duplication, possible medication-induced side effects, and assessing compliance and barriers to compliance.
- **Seizure Clinic:** In this one half-day per week clinic, residents will have opportunities to assess/initiate/adjust AEDs under the supervision of clinical pharmacist and attending physicians. In addition to having the same general responsibilities as those identified for the Stroke Clinic, residents will assure a comprehensive AED history is obtained, and appropriately monitor seizure response.
- **Headache Clinic:** In this clinic, residents will have the opportunity to assess/initiate/adjust medication regimens under the supervision of clinical pharmacists and attending physicians. In addition to having the same general responsibilities as those identified for Stroke Clinic, residents will also educate patients regarding signs and symptoms of headache, as well as triggers.
- **Dementia/Neurobehavior Clinic:** In this one half-day per week clinic, residents will have the opportunity to conduct an in-depth review of medication profiles, evaluating all medications and their potential to contribute to memory disorders. Residents will also be involved in telephone titration of dementia medications.
- **Movement Disorder Clinic:** In this one half-day per week clinic, residents will have the opportunity to provide detailed counseling on medications to patients diagnosed with various movement disorders such as Parkinson's, ataxia, and tremor.
- **General Neurology Clinic:** In this two half-day per week clinic, residents will have the opportunity to provide detailed counseling on medications to patients diagnosed with general neurologic disorders, particularly headache and neuropathy.

Teaching Certificate Program

NAME: _____ SOCIAL SECURITY #: _____
LAST FIRST MIDDLE

VAGLAHS is affiliated with the **University of Southern California (USC) School of Pharmacy**. Residents have the **option of a joint appointment** as Adjunct Associate Professor of Pharmacy Practice. Successful completion of this program results in a teaching certificate from the university. As a responsibility of the affiliation, the resident will participate in facilitating first, second, and third year clinical case discussion groups with pharmacy students one-half day per week, as well as have opportunities to lecture, and develop a clinical case. In addition, participating residents will attend USC-sponsored trainings which include physical assessment, teaching methods, ACLS certification, and research methods. The faculty appointment requires approval by the USC School of Pharmacy, as well as a Pharmacist License in the state of California. Please indicate below if you are interested in being an affiliated resident. If yes, a copy of your application will be forwarded to USC for review.

I am interested in the USC affiliated position ☐ YES ☐ NO

All required components of the application, including this supplemental document, must be submitted using PhORCAS™ by **December 31, 11:59pm EST**. *Please ensure all uploaded documents are complete/populated before submitting application.* You will be notified of the time and place for an interview, should one be offered.

Both our PGY1 and PGY2 residency programs participate in the ASHP Residency Matching Program (RMP). It is recommended that you register with the ASHP Resident Matching Program by the yearly established deadline. Download the Application Agreement from www.natmatch.com/ashprmp.
